

health sciences fact sheet - education

who?

the School of Health Sciences is the largest academic School at UEA, and together with the School of Medicine makes up roughly 25% of all students (and voters!)

demographics

health science students are more likely to be mature students, women+, carers, commuters, and in full-time employment than the UEA average. This often leaves them feeling excluded from Union activity - Think about how your manifesto includes them

PSRBs

hsc courses are regulated outside of UEA by professional bodies, or PSRBs. As education officer, you'll need to offer support to these students that can be achieved without major changes to curricula, assessment structure or quality

placement

hsc courses are 50% placement, which involve working in healthcare settings. The ability of students to learn in these settings is affected by everything from travel costs to racism - Think about how your promises will include these students
